WORK EXPERIENCE

Full Stack Java Developer Intern

February 2023 - July 2023

Ctronics InfoTech Pvt. Ltd, Amravati, India

- Developed a responsive web application using HTML, CSS, JavaScript, improving user engagement by 15%.
- Collaborated with a team of 4 to implement a RESTful API using Java and Spring boot, ensuring seamless data flow between the frontend and backend.
- Optimized database queries in PostgreSQL, reducing query response by 20%.
- Created web services for data exchange between client-server application using RESTful web services.
- Implemented object-oriented programming concepts like abstraction, polymorphism, and inheritance in Java code, improving code reusability by 30%.

Programmer Trainee

June 2022 - August 2022

Cognizant, Pune, India

- Completed rigorous training sessions on cutting-edge technologies and methodologies, demonstrating the ability to learn and apply skills 40% faster.
- Effectively worked in a team environment, communicating project requirements and contributing to code reviews and knowledge sharing sessions.

EDUCATION

Master of Computer Applications (MCA) (2021-2023)

Sant Gadge Baba Amravati University (SGBAU), Amravati, Maharashtra
CGPA: 8.38

Bachelor of Commerce (Computer Applications) (BCCA) (2018-2021)

Sardar Patel College (SPM), Chandrapur, Maharashtra
CGPA: 7.5

PROJECTS

Online Inward-Outward System (Live Project)

- Developed an Inward-Outward software designed for public relation management and document tracking, reducing processing time by 35%.
- Implemented file management and application tracking, ensuring 99.9% accuracy in document handling.
- Built using HTML, CSS, ASP.NET, C#, and MS-SQL, improving system reliability by 20%.

Student Management System

- Developed a student management system to record, analyze, and manage student data efficiently, improving data retrieval speed by 30%.
- Enabled real-time updates for teachers and administrators, reducing manual workload by 40%.
- Built using Core Java, J2SE, Oracle 10g, Spring Boot, Apache Tomcat, and REST APIs, increasing system scalability by 25%.

SKILLS

- Languages:** Core Java, J2EE, Javascript, SQL
- Frameworks:** Spring Boot, Collection Framework, JPA Framework
- Tools & Databases:** GitHub, PostgreSQL, MS-SQL, Oracle 10g, AWS Services, Kubernetes, Docker, Postman, ChatGPT
- Concepts:** Object-Oriented Programming, Microservice Architecture, RESTful APIs, Agile Methodology, SDLC Models

ACTIVITIES AND HONORS

- Successfully completed multiple coding challenges on platforms like LeetCode, CodeChef, and GeeksforGeeks, improving problem-solving efficiency.
- Engaged in open-source contributions, collaborating on GitHub repositories to enhance software projects and debugging issues.
- Attended tech seminars and hackathons, including events on cloud computing, AI/ML, and full-stack development, gaining hands-on exposure to industry trends.
